

CAPABILITY STATEMENT 2022

Surfside Engraving has been a leading Commercial Laser Engraver since 1998, based on the Gold Coast. Ideally set up for online orders to despatch anywhere within Australia and New Zealand. With a combined 42 years engraving our family business utilises only quality laser technology with all business accreditations and insurance compliance.

CO2 and Fibre laser systems in large or small scale orders have been processed utilising products such as traffolyte, trolase, ada signage, acrylic, stainless steel, anodised aluminium, aluminium, brass, wood, electrical tagging and switch plates. We aren't limited to "standard" sizing with custom ordering available and artwork capabilities. We will ensure that your orders are handled and expedited for your work requirements.

Large scale refits including Hospitals, Schools, Government buildings, Corporate refits and much more are just some of our larger projects. We also have a large data base of small businesses from Electricians, Gas Fitters, Building Developers, Clubs and the general public.

As a preferred to supplier to Emergency Services in Qld, Australia Post, Local Councils, major Tourism bodies we take pride in encompassing their high quality detail and requirements.

Companies can send through Tender details for us to accompany their major applications to ensure all needs are met in a timely manner.

We can assist you in many areas, trust in us for your needs with our experience, attention to detail and diligent handling.
